

Wednesday Challenge Form

Group Members: Andrew, Christian, Dimitri, and me

Problem Statement: Create a SketchUp of a building only with marshmallows, graham crackers, and pretzel sticks. You will receive one, and you must build it.

Approach: Make it stand tall, but still stable. It's gonna be tough, but it should be good. The SketchUp we received was easy to build, stable, and tall.

Solution: The structure we built won. It was easy to build, and stable.

Lessons Learned: Make it tall, stable, and easy to build.
