

Wednesday Challenge Form

Group Members: John, Sona, and me

Problem Statement: Decide to either take your Math class and receive the grade you earn, or Write out all the numbers from 1 to 1,000,000, And create an argument supporting your side.

Approach: We decided it would be easier to Take the class. First, we timed how long it took For each of us to write to 100. Then, we found The average, and multiplied it by 10,000, Because 100 is one ten-thousandth of 1,000,000. The end product was 10.78 days. Because you spend about 270 hours/11.25 days on math, including class and HW, it would be Much easier to take the class.

Solution: David's team won, they had the best Argument, and they were on our side.

Lessons Learned: Try to calculate EVERY Single possible outcome.
