

## Wednesday Challenge Form

Group Members: Half of the class, and me

Problem Statement: Half of the class must Simultaneously toss a pipe to their left, and Catch one from their right, both by only using Their right hand, 3 times, 3 different ways.

Approach: The first two stages (sitting down And standing up) were easy once we practiced Them. The third stage (throw it to the next person) required a special idea. Every other Person will face the other way, making it easier To throw/catch the pipe.

Solution: Even though we practiced a lot, the Other group beat us. Maybe practice less.

Lessons Learned: Don't spend TOO much time Practicing.
